1. Figures 1A, and 1B should be designated by a legend such as --Prior Art-- because only that which is old is illustrated. See MPEP § 608.02(g). Corrected drawings in compliance with 37 CFR 1.121(d) are required in reply to the Office action to avoid abandonment of the application. The replacement sheet(s) should be labeled "Replacement Sheet" in the page header (as per 37 CFR 1.84(c)) so as not to obstruct any portion of the drawing figures. If the changes are not accepted by the examiner, the applicant will be notified and informed of any required corrective action in the next Office action. The objection to the drawings will not be held in abeyance.
2. The following is an examiner's statement of reasons for allowance: the examiner found no teaching in the prior art that would render obvious the claimed method of controlling an antenna array system and an antenna array system including "determining a magnitude and phase relationship between a first signal sample taken at a first antenna element at a first time and a second signal same sample taken at a second antenna element at a second time, employing the magnitude and phase relationship to compute a projected signal sample for a virtual antenna element based on a third signal sample taken at the first antenna element at the second time".
3. Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
